

Use this sheet to obtain correct size of Knox Back Protector.

Place the hole on the nape of neck then get someone to measure off distance to your waist.

Check that this chart has printed out at actual size by confirming the measurements.

Know your spine... and you'll know why it has to be protected

Size Guide for Back Protectors

EN1621/2, the CE regulations for back protectors specify the Minimum area of the back which should be protected. This area varies depending on the length of your torso. Knox back protectors are made in many different sizes, from child's to adults, and is the only brand to fully comply with the CE regulations. Don't get caught out and buy the wrong size!

Award winning designs
